PROFESSIONAL SUMMARY

Results-driven System Analyst with 5+ years of experience in fintech, digital payments, and enterprise system development. Proven track record of leading end-to-end product development—from conceptualization to deployment—for large-scale financial platforms including NFC-based payment systems, commission processing hubs, event ticketing ecosystems, inventory management systems, and corporate bulk payment tools. Adept at bridging business requirements with technical execution, managing cross-functional teams, and delivering high-impact solutions in the digital payments space. Combines strong project management discipline with hands-on system architecture and network administration expertise.

EDUCATION

Bachelors, BSc (Hons) Computing
Islington College, Kamalpokhari, Kathmandu
London Metropolitan University
September 2018 – July 2021

High school, +2: Science
Kathmandu Model College (KMC)
Bagbazar, Kathmandu
June 2016 – June 2018

School Leaving Certificate (SLC)
Graded English Medium School (GEMS)
Dhapakhel, Lalitpur
June 2007 – June 2016

PROFESSIONAL EXPERIENCE

SYSTEM ANALYST
Nepal Digital Payments Company, Kathmandu, Nepal, August 2024 – Present

Product Development & Project Management:

- Managed product lifecycle for Namaste Pay's Subscriber (consumer) and Partner (business) mobile apps, enabling seamless UX, merchant management, transaction monitoring, and business analytics for enterprise partners.

- Spearheaded consolidation of dual-app ecosystem (Subscriber + Partner) into a unified Namaste Pay application; defined product roadmap, validated prerequisites, and authored comprehensive SRS to streamline onboarding and reduce maintenance overhead.

- Led development of USSD Menu Manager, establishing USSD as an access channel for digital wallet operations; dynamically configured all backend APIs via admin portal with integrated CMS for real-time menu and content updates.

- Led end-to-end development of NFC-based contactless bus fare payment system; managed product lifecycle, backend integration, NFC APK, and admin portal for transaction monitoring and reconciliation.

- Spearheaded commission processing platform for Nepal Telecom's SIM network; architected raw data ingestion, tiered commission computation, and automated reporting, reducing payout cycles from weeks to days while ensuring tax compliance.

- Managed full-stack event ticketing platform with three portals (user, admin, organizer); oversaw payment gateway, seat mapping, QR-based validation, and real-time inventory synchronization.

- Led inventory and order management system for SIM distribution, implementing real-time stock visibility, automated order processing, and seamless wallet integration.

- Directed corporate bulk payment solution for payroll, vendor payments, and government revenue; designed multi-bank account management, hierarchical approvals, and role-based access control.

System Architecture & Technical Leadership:

- Maintained overall system and network architecture, ensuring robust performance and security across financial applications while optimizing resource utilization and scalability.
- Developed detailed system specifications and workflows to optimize financial processes, enhancing efficiency and user experience in payment systems.
- Led system testing and validation processes, including UAT, to identify and resolve issues, ensuring high-quality deliverables and compliance with Nepal Rastra Bank regulations.
- Oversaw the entire Software Development Life Cycle (SDLC), from initial feasibility studies and system design to deployment and maintenance, ensuring timely delivery of fintech solutions.
- Developed and implemented IT policies and procedures to enhance security, compliance, and operational efficiency within financial systems.
- Managed relationships with third-party vendors, negotiating contracts and ensuring integration of external solutions aligned with business objectives.
- Managed data center (DC) operations and disaster recovery (DR) strategies, implementing best practices for data integrity and business continuity.

NETWORK ADMINISTRATOR
NIC Asia Bank, Kathmandu, Nepal, October 2022 – March 2024

- Configuration of network devices such as access routers (Huawei, Cisco), firewalls (CheckPoint, Fortinet, PaloAlto), switches (Cisco, Juniper, Raisecom), access-point (Ruckus, Cambium).

- Perform Network operation such as MAC-binding to ensure layer-2 security, provide internet access according to demand of the tasks, allowing different sites and network tools for better network management and security.
- Implementation of redundant / robust network infrastructure and maintaining, repairing and upgrading of network equipment.
- IP management, to allocate it for new users in different branches. Also, IP plan for new branches, ATMs, and offside ATMs.
- Network support for branches, ATMs and Offside-ATMs.
- Routing setup, VPN setup for secure network process with branches and third -party.

SYSTEM AND NETWORK MONITORING EXECUTIVE
Vianet Communication, Lalitpur, Nepal, March 2022 – October 2022

- Initiated and managed network test facilities to verify network hardness and resilience.
- Provided network support services for devices such as switch, OLT, routers and other hardware.
- Established robust infrastructure and data capacity for new applications and resolved network-related problems, such as created VPN infrastructure and allowed for secure remote connections.
- Configure routing protocols, VLANs, subnetting, etc settings to prioritize and manage network traffic effectively.
- Diagnose connectivity issues, latency, packet loss, and performance bottlenecks.

DEVELOPER INTERN
Tech Beetle Technology, Kathmandu, Nepal, April 2021 – October 2021

- Developed and maintained backend systems using Python and Django frameworks.
- Collaborated with the development team to build scalable server-side logic and API integrations.
- Recognized by management as a key organizational asset for consistently delivering high-quality code.
- Contributed to the full software development lifecycle (SDLC) within a fast-paced technology environment.

IT INTERN
CloudyFox, Kathmandu, Nepal, May 2019 – October 2019

- Supported IT team members by crafting project research material for implementation.
- Collaborated to assist protocol development and offered consultation based on cross-functional knowledge.
- Researched new technologies to boost information security.
- Supported the IT department in handling technology rollout and maintenance.

CONFERENCES ATTENDED

SANOG 38 (South Asian Network Operators Group), 18–21 July 2022

- Attended a 4-day conference focused on network management, monitoring, and security.

- Participated in sessions by Dave Phelan, Senior Network Analyst and Technical Trainer, gaining insights into building and managing robust ISP networks.
- Topics covered included carrier transmission networks, system administration, and challenges in core, edge, and customer network operations.

LANGUAGES

- English: Proficient (IELTS 8.0)
- Nepali: Native
- Hindi

SKILLS

Category	Skills
Product Management	Product Lifecycle Management, Requirements Gathering, User Story Definition, Feature Prioritization, Cross-functional Coordination, Agile/Scrum Methodologies
Project Management	SDLC Management, UAT & QA Leadership, Stakeholder Communication, Vendor Management, Risk Assessment
System Architecture	System Design & Specifications, Workflow Optimization, Scalability Planning, API Integration, Database Design
Network & Security	Network Administration, Firewall Configuration (CheckPoint, Fortinet, PaloAlto), Routing & VPN, Cybersecurity, Disaster Recovery
Fintech & Payments	Digital Payment Systems, NFC Technology, QR Code Payments, Bulk Payment Processing, Commission Processing, Wallet Integration
Development & Tools	Backend Development, System Monitoring, Data Analytics

Soft Skills	Problem-Solving, User-Centric Approach, Adaptability, Innovative Thinking, Ethical Technology Use
